

THE DIFFERENCE BETWEEN ADMIN AND BADMIN IS THE HOURS SPENT IN POINTLESS CLICKING.

MANAGE HP QC WISELY

Assure Admin Console for HP ALM & Quality Center

HP Software Gold Business Partner 

HP Software Interoperability 

- Streamline your Administrative tasks to lower the TCO
- Save time and money
- Provides Key administrative reports that enable you to make the right decisions, understand HP QC usage and gain visibility

THE CHALLENGE

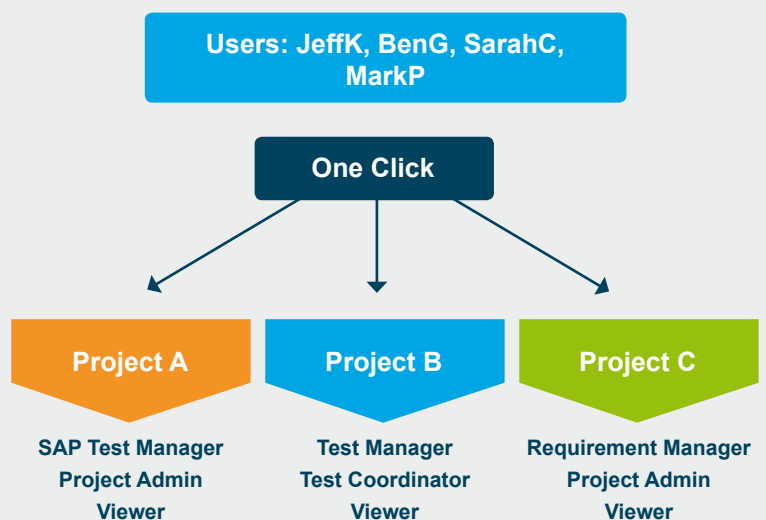

Administration of large HP Quality Center environments is time-consuming. Quality Center's administration interface is not sufficient for big organizations with a large number of users and projects. Most changes have to be done one by one, which consumes valuable time.

THE SOLUTION

By streamlining administrative tasks, Assure Admin Console dramatically lowers the TCO of HP Quality Center administration.

Assure Admin Console combines intuitive Administration tools with key reports and metrics that help you make critical decisions and optimize your HP Quality Center environment.

ASSIGN MULTIPLE USERS TO MULTIPLE PROJECTS AND MULTIPLE GROUPS WITH JUST ONE CLICK

How it Works

- Group administrative tasks together and apply them to QC in one click
- Server Based for great Performance
- Intuitive Web UI
- Using HP QC's in-built authentication and APIs
- No Changes required to your QC server

Key Features:

User Management

Add users to multiple user groups in multiple projects at once. Copy users and user groups between projects. Batch create new users.

List Management

Share, add, remove, copy and merge lists across projects.

User Group Management

Manage User Groups across projects. Standardize and enforce your User Group policies by setting permissions across multiple projects or even for all projects on the server.

Import Data

Admin Console enables you to import data from external sources. Import users, lists and other items from e.g. Microsoft Excel sheets.

Cross-Project Administration

Any administration task can be executed across multiple projects at once.

Execute huge tasks with ease

Remove hundreds of obsolete users at once. Save the same Project List to dozens of projects. Get a list of all projects on the server, sorted by number of test cases in projects. Get a list of all inactive users on your server.

Administrative Reporting

Analyze project usage and user activity through reporting to provide key information to decision makers and stakeholders.

Audit Trail

Keep track of all administrative activities.

Web UI

Assure Admin Console is built by using the latest in Web 2.0 technology. Using Admin Console does not require QC components to be installed on the client PC. Tasks can be run on the background.

ABOUT ASSURE

Assure provides innovative products and solutions for HP Quality Center customers. Using our solutions companies can achieve a standardized and enhanced use of HP Quality Center while lowering the TCO. Our growing partner network enables us to offer our solutions globally.
